

Belt Cleaning and Conditioning

-belt handling for non food contact belting-

Soap and Water	Can be used for all belts; nylon belts should be dried after washing.
Alcohol	Do not use on PVC or PUR belting
Alkalis (low concentration)	Do not use on belting with EPDM Rubber
Ammonia	Do not use on NBR, EPDM, or Silicon covers
Borax	Good for all belting
Chlorine	Do not use
Kerosene	Do not use on PVC or EPDM covers
Trichlorethylene 1-1-1	Spot cleaning on all belts using dampened cloth
Live Steam	Do not use on nylon belts
Household Cleaners	Many are useful, check formulation, perform test
Belt Dressing	Do not use; follow tension recommendations
