

Tired of Nylon Separation?

Switch to NITTA PolyBelt™ to Eliminate Nylon Core Belting Separation

THE NITTA ADVANTAGE

The most difficult power transmission applications require the strongest belting, but not all high-strength belts are created equal. Nitta's **PolyBelt™** line of nylon core belting retains its integrity because the top-quality materials and rigorous requirements of Nitta's truly "American Made" manufacturing process ensure strong adhesion of all layers. Nitta belts outperform competitors' products, continuing to run long after other belts have experienced delamination.

Belt Type	Thickness (mm)	Shaft Load @ 2% (N/mm)	Min. Pulley Diameter (mm)
MA-2000	4.0	60	140
MH-3000	5.5	90	240
MH-4000	6.5	120	320
