
NITTA CORPORATION OF AMERICA

**... Proud to be a
“Made in America”
Manufacturer**

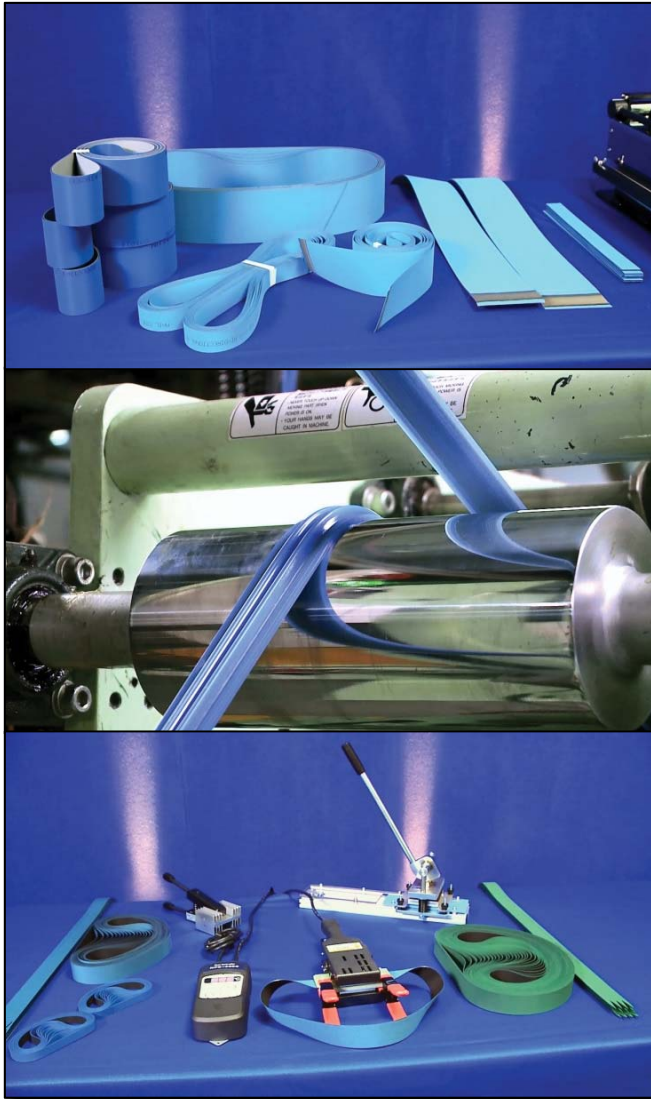

Nitta Corporation's Investment in America

- **1885** – Nitta was founded, beginning its more-than-130-year history
- **1980** – Establishment of Nitta's US division
- **1989** – Nitta began manufacturing nylon core power transmission belting in the US
- **1998 to 1999** – Construction of new headquarters for Nitta Corporation of America in Suwanee, GA:
\$6 million investment by Nitta Group
 - Facility established as manufacturing location for all Nitta nylon core belting in the US
- **2000** – Addition of flat aramid cord belt manufacturing line to NCA
- **2010** – Modification of aramid cord line to add extruded v-guide belt manufacturing capability
- **2016 to 2017** – Construction of NCA facility expansion: **\$10 million additional investment by Nitta Group**

Truly American Made Flat Power Transmission Belting

Nitta stands alone as the only vertically integrated US manufacturer of flat power transmission belting.

- **PolyBelt™**

- Nylon core
- Skive splice

- **Carryflex™**

- Aramid cord
- Finger splice
- Flat or with extruded v-guide

- **PolySprint™**

- Expansion will add US manufacturing capability
- Polyester core
- Finger splice

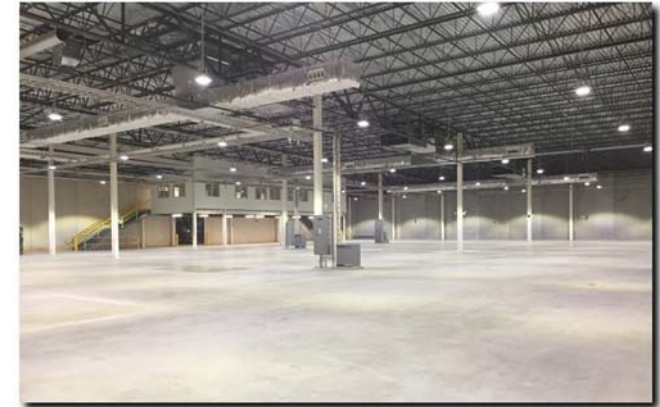

NCA Expansion

- **Additional Production Facility**

- Adds nearly 50,000 square feet onto the existing 85,000-square-foot facility, for a total of approximately 135,000 square feet of space

- **Additional Equipment**

- PolyBelt manufacturing capacity
- PolySprint manufacturing ability
- Conveyor Fabrication capacity
- CF Machine enhancements

- **Additional Personnel**

- 25% growth in US workforce as expansion is completed, increasing from 81 employees prior to expansion to more than 100 by early 2018

- **Current Status:**

- We recently hosted our open house and are installing new equipment as it arrives

NCA Expansion – New Equipment

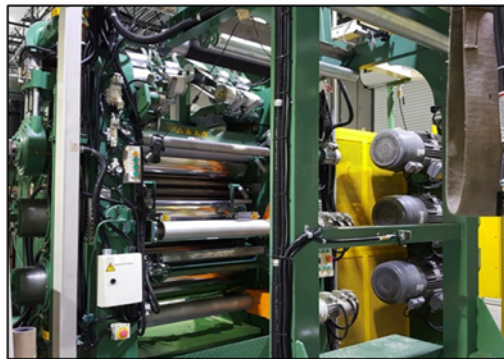

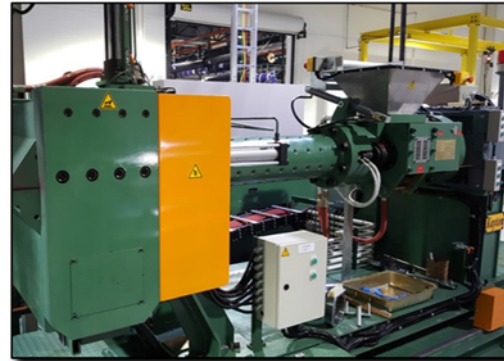

New equipment to be added for the expansion includes:

- **Manufacturing**

- Mixing Mill
- 120mm Cold Feed Extruder
- 4 Roll Calender Machine
- Cooling & Winding Train
- Fabric Slitter
- Rotocure

- **Conveyor**

- 1200mm Slitter
- Automatic Measuring Machine

Summary

- Nitta Group has shown a true commitment to the USA during its long history and, with Nitta Corporation of America as its base, to the rest of North and South America as well.
- The facility expansion for NCA demonstrates a substantial continued investment in America by Nitta Group, increasing the size of Nitta's US workforce, adding to its line of "Made in America" products, and improving production capacity.
- When it comes to choosing a source for belting, NCA would ask that the many benefits Nitta has to offer be taken into consideration: the dependability of a vertically integrated US manufacturer, the high quality of truly American-made goods, and the opportunity to join Nitta's ongoing efforts in support of the US economy.
